HÖGERT WORKWEAR DESIGNED ACCORDING TO THE THREE-LAYER PRINCIPLE

Högert Workwear's collections of health and safety clothing and accessories are complementary products. They are essential for proper body protection. This range of clothing is addressed to people who require comfort and effective protection of the body from workwear in all conditions. The offer includes hats, chimneys, gloves, socks, shoes, and work sets - summer, winter, warning and specialized. A large selection of sizes and simple adjustment allow for selection of sets perfectly adjusted to the height and type of figure.

HÖGERT WORKWEAR IS DESIGNED ACCORDING TO THE THREE-LAYER PRINCIPLE

Each of the three layers has a different purpose and properties. Together the layers complement each other in action and create a functional technical garment. The system is based on the right combination of each garment so that the whole can warm, wick away moisture and protect against weather at the same time.

THE SYSTEM CONSISTS OF:

First layer **THERMOACTIVE UNDERWEAR**

Underwear is worn directly on the skin so it should fit well. It provides optimal thermal insulation and quickly wicks sweat away from the skin to the outside.

Second layer **FLEECES & SOFTSHELLS**

The second layer heats and at the same time receives and passes on the accumulated water vapour. It supports the body's natural thermal regulation and ensures a feeling of comfort regardless of the weather conditions.

Third layer **JACKETS**

The third layer is the outer jackets, which are designed to protect from the weather, namely rain, snow and wind.
